LCA Verification

Carbon footprint of a Jabra Evolve2 85 – Cradle to Grave

Data version no. 2022-03-10

This document includes the overview of the verifiers' dialogue and the checklist for verification of LCA.

The review is towards the procedural and methodological requirements in ISO 14067:2018.

This standard is a connection with the GHG management family of standards. Namely, the LCA

This communication and critical review requirements from ISO 14044:2006, and requirements for the carbon footprint of products from ISO 14067:2018.

Verification statement

We hereby confirm that, following the checks performed in accordance with the limits of the scope of our appointment, nothing has come to the verifiers' attention to suggest any data errors or deviations from the requirements by the above-referenced LCA project report, in terms of

- the underlying data collected and used for the LCA calculations,
- the way the LCA-based calculations has been carried out to comply with the calculation rules,
- the presentation of environmental performance included in the LCA, and
- any other information included in the declaration.
- plausibility and consistency of the company-specific data that have been examined. The declaration owner is responsible for its factual integrity and that the product does not violate relevant legislation.
- We have sufficient knowledge and experience of construction products, the construction industry, relevant standards, and the geographical area of the LCA to carry out this verification.
- We have been independent in our roles as verifiers in accordance with the requirements and guidelines of quantification of carbon footprint, i.e. We have not been involved in the execution of the LCA or in the development of the declaration and have no conflicts of interest regarding this verification.
